

Wilkhahn

AT

AT's design and fluid lines immediately suggest it's a comfortable chair for people to sit and benefit from a range of motion in all directions.

AT

187 range, design: Wilkhahn

Powered by Trimension, Wilkhahn's free-2-move concept is a global benchmark in healthy three-dimensional seating. With its unified and harmonious design, the variety of models and customizable features make the AT chair family the smartest option among the free-2-move ranges. The auto-centering mechanism of the seat shell ensures that your body maintains its center of gravity – regardless of the posture adopted or movement made. The backrest bearer with tilt capability comes with automatic weight adjustment. As a result, using AT's ergonomical range of motion is child's play. Just sit down, adjust the seating height and you're done! The chair and your body will do the rest on their own ...

The patented Trimension® kinematics encourages natural and fluid motion in all directions. The three-dimensional stimulation of the joints, spine and muscles prevents backache and joint problems, boosts well-being and promotes concentration.

In today's office environments, an attractive design and the encouraging of physical activity play a key role in productivity. An exceptional environment helps attract and retain sought-after employees. The positive effects of Trimension on health, well-being and mental agility have been carried out by three scientific case studies.

AT's modern aesthetic also sets a new standard in office chairs: all crossover points have been carefully pinned down to the last detail so that the frame's structure appears seamless. Choosing white for the seat and backrest shell increases the design options for different environments and delivers a fresh look with an almost home-like appeal.

Combining the chair with table and conference chair ranges based on the same integrative design produces seamless design solutions – such as the Occo range here, designed by jehs+laub.

All office chairs from one range: AT with a high backrest, headrest, neck rest, leather upholstery and a classy frame is the perfect addition to an executive office.

If the task chair has only one dedicated user, the automatic weight adjustment comes with a preset with 10 increments to adapt to personal preference.

The wide range of fabrics and colors provides variety and consistency within an office concept.

When combined with height-adjustable tables, the models with an elevated seating position (ESP from 16½" – 23½") encourage people to alternate between sitting down and standing up.

In detail

Seat/backrest shells, backrest bearer and frame

AT's key components are available in black or white, the backrest shell is also optionally upholstered at the rear. The armrest pad and all controls are always gray. The different upholstery elements make three backrest heights possible: medium height, advanced height and advanced height with headrest and neck rest. The upshot is a wide range of models for any area requiring office chairs. Fabric and leather upholstery from the Wilkhahn collection equip AT with almost infinite design possibilities.

Height adjustment/ seat-depth extension

Icons on the controls illustrate what they do: the lever on the right adjusts with precision the seating height, the knob conveniently adjusts the seat depth while the user is sitting down.

Locking/optional presetting the automatic weight adjustment

The push button on the left locks the chair in a neutral 0 position and the knob allows presetting in ten increments to adapt to personal levels of comfort.

The height of the **armrests** is adjustable by 3.9" at the touch of a button. The depth of the armrest pads on 3D armrests can also be extended by 2" and the width by 1", 4D armrests can also rotate inwards and outwards by 25°.

Integrated lumbar support and optional 3D forward tilt

All AT models feature integrated lumbar support. The lumbar height is also very easy to adjust by 2.4" via two handles on the sides of the backrest. The optional activation of the innovative forward seat tilt raises in synchrony the backrest and the lumbar support.

Trimension®

Without altering the chair, the auto-centering suspension of the seat shell, the backrest bearer, and the automatic weight adjustment allow bodies to maintain their center of gravity – whatever the posture or movement is. The coordinated design of each component creates a sculptural and seamless form. The chair conveys the fluid, automatic and intuitive movements that the user makes.

Frame surfaces

All plastic components are in black or white (the synchro-adjustment mechanism, backrest bearer, seat and backrest shell and armrests)

Armrest pads, controls

Gray

Upholstery material for seat and backrest shell

37 | 47 | 54 | 60 | 62 | 63 | 66 | 67 | 68 | 69 | 91 | 92

You can find all upholstery materials and further colors in our media center.
The backrest shell can also be covered.

Star base

Aluminum powder coated in black or white, polished or high-luster polished or black through-dyed, fiberglass-reinforced polyamide

Basic functions

Trimension® with automatic weight adjustment and height-adjustable lumbar support

Optional extra features

- If desired, automatic weight adjustment with presetting in 10 increments
- Contact suppression feature
- Patented 3D forward tilt with the seat and back raised at the same time can also be activated
- Seat-depth extension
- Height-adjustable armrests (1D), with depth and width adjustment (3D), with additional swivel capability (4D)
- Armrest pads with a soft-touch surface

In addition to office chair models with normal height adjustment and an elevated sitting position, AT also has height-adjustable counter stools with adaptable foot rings. These models aren't just used at counters, but also at high tables in modern project rooms so that people are at the same level when they're sitting and standing.

AT task chair
