

# Confair Folding Table. Green Star Contribution.

design made in germany

# Wilkhahn

Confair folding tables have undergone an independent third party verification process, and have been awarded the Good Environmental Choice Australia (GECA) Ecolabel. The GECA Ecolabel is the only environmental labelling program in Australia which indicates the environmental performance of a product from a whole of product life perspective. The label is awarded to products that meet voluntary environmental performance standards which have been created and assessed in conformance with the international environmental labelling standard ISO 14 024. The program is internationally recognised and growing in demand and awareness throughout different industries. Further information on the GECA Label can be found at [www.geca.org.au](http://www.geca.org.au)

As a result of being awarded the GECA Ecolabel, when Confair folding tables are assessed by the Green Building Council of Australia's Green Star Office Interiors Rating Tool, they can be classified as "Environmentally Innovative". The aim of the credits within Green Star is to encourage and recognize the selection of office furniture that has a reduced impact on the environment relative to available alternatives. Accordingly, the Green Building Council's compliance criteria states that any product classified as "Environmentally Innovative" (i.e. holding the GECA Ecolabel) will be awarded the maximum points by the Green Star Office Interiors Calculator. This means the Confair folding tables will achieve a product score of 100 %.

## Product category

Tables

## Environmental facts

- Confair folding tables are comprised of 18 percent recycled material (aluminium/steel/wood).
- Confair folding tables are 90 percent recyclable. All components permit non-destructive disassembly.
- All components, such as foot sections, uprights and underframes in die-cast aluminium and aluminium extruded profile and the mechanical springs in steel combine dimensional stability with high load capacity and are 100 percent recyclable. The four lockable swivel castors in break-proof and through-dyed polyamide are designed to provide maximum service life.
- Confair folding tables were first launched in 1994. The longevity of the high-quality materials, the innovative table concept and the classic design guarantee usability over decades.
- All Wilkhahn sites work in conformity with a uniform environmental management system that is validated at the Bad Münder site (Germany) and certified in accordance with EMAS ISO 14001.

Wilkhahn supports corresponding certification on the part of its suppliers.

## Green Star

Green Star is a comprehensive, national, voluntary environmental rating scheme, developed by the Green Building Council of Australia, that evaluates the environmental design and achievements of buildings.

It covers a number of categories that assess the environmental impact that is a direct consequence of a project's site selection, design, construction and maintenance. The nine categories included within all Green Star Rating Tools are:

- Management
- Indoor Environmental Quality
- Energy
- Transport
- Water
- Materials
- Land Use & Ecology
- Emissions
- Innovation

Further information on the Green Building Council of Australia and Green Star Rating Tools can be found at [www.gbcaus.org](http://www.gbcaus.org)
