

Wilkhahn

Sola

The cushion-like management grade upholstery lends this dynamic-looking chair an informal air, inviting people to take a seat.

# Sola

---

290 range, design: Justus Kolberg, licensed by Davis furniture

---

In typical Wilkhahn style, the swivel-mounted and height-adjustable Sola conference chair combines innovative comfort with a crisp design and high-quality appeal. The chair's aesthetic is defined by the linear shape of the seat shell and the distinctive lines of the aluminium frame. The frame branches out from the centre column into a V-shaped support that culminates in the armrests. The clever part is that the slender seat shell is swivel-mounted at the front and connected with a V-shaped support by two pressure springs at the rear. As a result, the chair offers sprung comfort, adjustable to suit preferences and a rocking motion so body and mind stay alert however long meetings last.

In addition to the clear design and the rocking feature, the first-class craftsmanship of the upholstery is also impressive. The back of the covered plywood shell includes double-thickness upholstery which creates a gap all the way round. This enhances the already slender profile. The type with management grade upholstery also has facing all the way round and quilted stitching, lending the chair a classy and slightly luxurious touch.

Its castors and ergonomic qualities make Sola an especially versatile piece of furniture ideal for conference rooms to meeting and project spaces to executive boardrooms.

Sola coordinates with customised design concepts due to the broad range of frame surfaces and upholstery available.

Precision and an attention to detail is also reflected in the upholstery. Stitching across the front divides the backrest into two areas and prevents unwelcome creases from forming.

---

## In detail

The shell, swivel-mounted at the front, sits on the V-shaped support due to two pressure springs at the back. The springs are encapsulated, making them look like shock absorbers. One acts as a force accumulator the other allows adjustment of the counterpressure. The lever to adjust the height is integrated in a subtle and space-saving way.

A practical serrated knob can be turned to make the counter pressure harder or softer depending on body weight, leverage and individual preferences. A retractable, easy-to-use lever will stop the chair from rocking if required. Whatever way you look at Sola, it's a sophisticated chair with an exceptional and high-quality design.
