Techni-station
Compact / Compact Add.

Techni-station Compact.

- Modular: various installation frames can be inserted into the power supply ports. It's simple. And tool-free.
- Versatile: equipped to cope with current and future communications requirements thanks to practical exchangeable ports.
- Functional: ideal for flexible and dynamic tables (mAx, Timetable, folding tables) due to the exceptionally compact size of the housing
- Stylishly integrated: frame made of die-cast zinc, matt chrome plated with aesthetic lines and rounded edges

Techni-station Compact Add.

- Versatile: flexible techni-station for assembly on the table edge. Simple and tool-free fastening method with a knurled screw
- Robust: a two-millimetre thick, RAL 9006 powder-coated metal housing
- Functional: ideal for flexible and dynamic tables (mAx, Timetable, folding tables) with panel thicknesses up to 30 mm
- Feature-rich: concealed cable management underneath the table top and plastic pressure plate to protect the table top

Techni-station Compact. Configuration options.

Wilkhahn

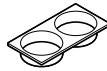

Whether it's a case of the electricity supply, wireless charging, or USB charging, network connections or just a cable outlet:
three installation frames, four ports and other optional modules enable dozens of configuration options that are child's play to change at any time. The techni-station Compact offers maximum and fast flexibility and can therefore handle current and future demands superbly.

Integrated techni-station Compact

701/95

Die-cast zinc, matt chrome installation frame. Fitted installation frame, round or square single frame or a rectangular double installation frame to integrate exchangeable ports. The various ports are slotted into the installation frame without any tools. Cable harness covered with black textile sleeving on request. Optionally with the following ports:

Cable outlet

Matt chrome cable outlet port with a brushed profile

Wireless charging port

1 x port with a wireless charging module (Qi compatible) to charge appropriate mobile devices with supply leads approx. 250 cm long and with power supply unit

Power supply module

1 x power supply module (when ordering please state the local standard) with 40 cm long supply lead, mod. 708/8
2 x slots with cover for optional Keystone modules

USB charging port

1 x port with 2 x USB chargers (charging current 2.1A) to charge up to two mobile devices with a supply lead 40 cm long, mod. 708/8
2 x slots with cover for optional Keystone modules

Optional

Keystone modules as thru-type coupling, exchangeable, without leads:
RJ 45 jack (category 6) or HDMI jack

Wilkhahn

What happens if your smartphone's battery has run out and you don't have the charger lead on you? That's no problem with the techni-station Compact's wireless charging module. The module is ideal for cordless charging and Qi compatible – a standard supported by numerous leading manufacturers. As a result, a whole host of mobile devices can be charged with this innovative technology in no time.

- Practical: simply place the device on top to charge it
- Multipurpose: recharging is possible whoever the manufacturer is
- Durable: there is no longer any wear and tear on the connectors

Techni-station Compact Add. Designs.

Wilkhahn

The Compact Add techni-stations can be flexibly fitted to the table edge and are available in two designs: with a power supply module or a USB module that has two USB charging ports to charge mobile devices. Both versions can also be optionally fitted with two additional communications ports.

The Compact Add techni-stations are therefore ideal for mobile use of custom-configurable connection solutions.

Techni-station Compact Add

701/97

Flexible techni-station for tool-free assembly on the table edge using a knurled screw. Can be used on straight and bullnose edges (for table top panels 12 - 30 mm thick). Robust metal housing, coated similarly to RAL 9006, black plastic, pre-wired modules including cables. Cable harness covered with black textile sleeving on request. Optionally with the following ports:

Power supply module

1 x power supply module (when ordering please state the local standard) with a supply lead approx. 270 cm long
2 x slots with cover for optional Keystone modules

USB charging port

1 x port with 2 x USB chargers (charging current 2.1A) to charge up to two mobile devices with supply lead approx. 270 cm long (when ordering please state the local standard)
2 x slots with cover for optional Keystone modules

Optional

Keystone modules:

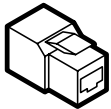

RJ 45 jack (Category 6) with permanently attached lead, approx. length 270 cm or
HDMI-jack with permanently attached lead, approx. length 270 cm

Techni-station Compact / Compact Add. Options.

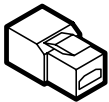

Wilkhahn

Techni-station Compact (for a power supply module and USB charger module):

Keystone modules without lead
as thru-type coupling, exchangeable:

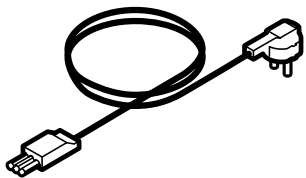

RJ 45 jack
(category 6)

HDMI jack

Supply lead
in various lengths:
2 – 5 m

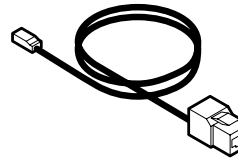

Textile sleeving
for cable harness

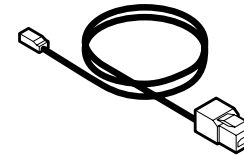

Techni-station Compact Add:

Keystone modules with lead:

RJ 45 jack (category 6)
with lead permanently attached,
approx. 270 cm long

HDMI jack
with permanently attached cable,
approx. length 270 cm

Techni-station Compact / Compact Add. Standards/certificates.

General product information

The following aspects are included in all techni-stations:

- Full works inspection
- (H) symbol, (recycling) RESY

Information on materials

Plastics:

- self-extinguishing compliant with UL 94 (FR)
- Low heavy-metal content

Certificates + standards

Techni-station Compact: TÜV-tested, CE-compliant

Wireless charger: CE-compliant, EMC-tested
