Timetable. 610/612/614 range.
Timetable™.

Combining brains and beauty produces fascinating solutions that quickly pay dividends. Designer Andreas Störiko created Timetable for Wilkhahn and added a new dimension to the concept of high-quality conference areas. In just one simple step, the table top can be tipped up and the foot section with lockable castors turned inwards fully automatically at the same time. As a result, the tables are not just easy to move from room to room, but also compactly nest into one another.

Their intuitive handling, high quality and smart appeal are ideal for dynamic conference areas and save both space and time. After all, furnishing costs are often just a fraction of the room and facility management expenditure. Anyone investing in intelligent, quality solutions can save a lot of money in the long run.
Timetable™ Smart.

The Timetable Smart follows the Timetable principle and taps into another application: transportable and dynamic furnishing of multipurpose areas, such as versatile training rooms, project offices, canteens or meeting places. We only use table tops made of tough boards (60 x 150 cm, 75 x 150 cm (23 5/8" x 59", 29 1/2" x 59")) coated with melamine resin with plastic lipping in the same colour. The frame has an extremely hardwearing swivel mechanism (which does not cause the foot section to rotate) with integral storage buffer. The table top is locked both horizontally and vertically. The locking mechanism is released by simply pulling out the horizontal draw rod and pivoting the table along its horizontal axis. The wide frame with less of the table protruding at the sides, gives two chairs enough space between the foot sections, so that the table offers enough legroom for four people sitting opposite one another.

Another bonus is that the table’s sturdy design allows sophisticated power supply solutions – either as standby options for temporary work spaces, or with permanently integrated multi-media technology, as a flexible facility for conference and training areas.

Design: Andreas Störiko
Timetable Shift.

Scaleable.
Multipurpose.
Ingeniously combinable.

Timetable Shift combines Timetable’s swivel-mounted table top principle with the frame design of the established Logon conference table range. The signature uprights are topped out by a high-precision aluminium casting. Its dual function provides a stable bearer for larger table top sizes and a shoe for a spacious cable channel for connecting the table and multi-media equipment to the power supply. Sturdy hinges allow wide surfaces to be safely tilted and an easy-to-use draw rod locks the table top horizontally or vertically. Specifiable in increments of 5 and 10 cm, formats of 150 to 210 cm in width and from 80 to 105 cm in depth are available to suit customer preferences. The applications are therefore limitless, from temporary work spaces, to tables for meetings or as conferencing systems. And what’s more, Timetable Shift offers seamless solutions on demand by combining static Logon tables in suites that are sub-divided by folding partitions, extracting optimal performance from high-value communication-driven space.

Design: Andreas Störiko
Function
A mobile table range with table tops folded along their horizontal axis and feet that turn in automatically at the same time (not in Timetable Smart and Timetable Shift models). Destined for a variety of uses in multipurpose spaces and for interactive and dynamic conference types. Ideal when combined with the Confair and Logon table ranges for multifunctional use of high-quality conference, presentation and meeting spaces. Timetable Smart is ideal for multipurpose areas and temporary workspaces. With flip-top table tops they nest compactly into one another. Timetable Smart comes with a locking mechanism and staggered storage when tables nest into one another is possible.

Frame
Timetable/Timetable Smart
Foot section in die-cast aluminium, bright chrome-plated or polished. Uprights and underframes in tubular steel, coated in black or with a silver satin finish. Uprights optionally available with a bright chrome-plated finish (standard Timetable only). Die-cast zinc table top bearer, coated black. Timetable Smart with table top bearer in steel profile, draw rod in round steel tubing, coated black. Lockable, height-adjustable, swivel castors with a black polyamide tyre are the standard version for carpeted floors; castors available with a polyurethane tyre for hard floors (please specify when ordering).

Timetable Shift
Standards
The Timetable Shift tables comply with the DIN EN 527 standard.

Frame
Die-cast aluminium foot section, bright chrome-plated, polished or with a silver satin finish or black coating. Aluminium profile upright, clear anodised or with a silver satin finish, or black coating; with bright chrome-plated foot sections, coated in black. Uprights optionally available as bright chrome-plated versions. Aluminium profile under-frame, with integrated cable channel, depending on the foot section coated in silver satin finish or black. Steel profile table top bearer. Round steel tubing draw rod, depending on foot section, black or silver satin finish coating. Lockable, height-adjustable polyamide swivel castors.

Core material of table top
Particle board with bullnose wood lipping with integral, impact-resilient profile in black elastomer. Timetable Smart with melamine resin directly coated in light or dark grey and with straight, colour-matched plastic lipping, or optionally with plywood with bullnose, colour-matched wood lipping with integrated impact-resilient profile made of black elastomer.

Table top group 1 – laminate
Table top thickness 26 mm Laminate based on the Wilkhahn colour and surface finish samples with wood lipping, natural oiled finish.

Table top group 2 – veneer
Table top thickness 26 mm Variant 1: Beech, oak and ash veneer from Wilkhahn woodstain colour samples with wood lipping, as far as possible in the same colour as the veneer Variant 2: Maple, walnut or elm veneer, as well as Wilkhahn Mocca veneer from the Wilkhahn woodstain colour samples with wood lipping colour matched as far as possible with the veneer.

Veneer types
As a standard, the veneer panels are slip-matched. Surfaces sealed with clear lacquer: open-pore: oak, ash, walnut and elm veneer, as well as Wilkhahn Mocca veneer closed-pore: maple and beech veneer. Some specific growth features possible.
**Table top group 3 – linoleum**
Table top thickness 27 mm Linoleum from the Wilkhahn woodstain colour samples, with laminated beech lipping, natural oiled finish

**Table top group 5 – direct coating (only for Timetable Smart)**
Table top thickness 25 mm Melamine resin, directly coated in white, light or dark grey with plastic lipping to colour match the finish. Further finishes for the formats shown in the price list are available on request.

**Modesty panels**
Aluminium frame, coated with a silver satin finish, in anthracite or covered with black fabric. Black polyamide handles.

**Table-table-connectors (optional)**
Table-table connectors metal - Model 613: 2 lockable circlips made of black coated sheet steel with 4 star-grip screws and additionally for Timetable Smart: table-table-connectors in plastic. Model 616: two rotatable circlips and 2 collets made of black through-dyed glass-fibre-reinforced polyamide with washers.

When placing repeat orders, please indicate whether your table tops have slip-matched or book-matched veneer.

**Edge profiles**
- Standard version: Bullnose double with integral, impact-resilient profile
- Alternatively: Straight with integral, impact-resilient profile
- Timetable Smart, bonded surface straight edge

Subject to change.

Table tops with veneer, laminate (not shown) and linoleum (not shown) each available as specified on Wilkhahn’s material sample card. Bright chrome-plated or polished foot section (not shown). Uprights and underframes coated in black or silver satin finish (not shown), optionally bright chrome-plated.

Table tops with light or dark-grey direct coating (not shown), foot section is polished or bright chrome-plated (not shown). Uprights and underframes are coated in black or silver satin finish (not shown), optionally bright chrome-plated.

Table tops available in laminate, linoleum and veneer as specified on Wilkhahn’s material sample card
Foot section bright chrome-plated or polished

**Table top groups**

Laminate, veneer type 1 or 2, linoleum, (Timetable Smart only available with direct coating), you can find further surfaces in our media center.

**Laminate.** The material is made by bonding cellulose and décor paper layers, as well as resin, by applying heat and pressure. This produces an extremely tough surface that comes in a variety of different colours. Laminate is highly recommended for areas where the tables are subject to a lot of wear and tear because they are frequently moved around for example.

**Wood veneers.** Natural wood is a living material: in the way it looks and changes over the years. Sometimes more significantly and sometimes more subtly, depending on the type of wood and how light it is. If a more consistent look is preferred, stained surfaces or industrially produced veneer (e.g. mocha) are available.

**Linoleum.** The material consists of linseed oil and natural resin that is applied to a backing layer and protected with a matt-glossy lacquer. In terms of haptics, it is not just extremely pleasant, but naturally anti-static too. Virtually no finger prints or dust stick to the surface. Over the years linoleum table tops gain a characteristic patina.

**Foot section and upright**

Bright chrome-plated or polished aluminium, coated in black or with a silver satin finish (clear anodised instead of polished uprights)

You can find our current fabric collection in our media center.

**Environment and product**

**Space-saving, repair-friendly and easy to recycle**

Using Timetable helps sustainably improve a building’s eco footprint. Compared with the ecological costs of facility management, energy and maintenance of spaces that could be saved, the environmental impact of producing and recycling the furniture is virtually negligible. Furthermore, the table even fulfils all the typical requirements Wilkhahn makes regarding an ecologically responsible design concept:

- The design is timeless and doesn’t copy what’s currently in vogue. Its form and function are in perfect harmony. All components are screwed together and can therefore be repaired, replaced and dismantled at the end of a long product life. Most of them can then undergo a mono-fraction sorting procedure and be recycled.

- The materials used for the frame keep to exact dimensions and are sturdy. They offer a superb aesthetic and can be recycled. Some of the aluminium on the foot sections and the connecting underframe, the steel in the uprights and the stabilising core and the zinc in the mechanism is already made of recycled materials and can be fully recycled afterwards too. The four lockable castors and the flip-top mechanism’s guideways are made of very strong plastic and designed for maximum durability.

- The table top is made of E1 class particle board with wood lipping and can also be fully recycled. Natural materials like laminates and genuine wood veneers are used as surfaces. Veneered table tops are protected with water-based varnish low in solvent content. The integrated polypropylene impact-resilient profile protects the edges and prevents damage.

Just like its “big brother” (the flip-top table from the Confair range) the Timetable range uses an innovative concept that’s ideal for compact use of space that enables huge ecological efficiencies and economies in office buildings over and above the ecological quality of the product itself.

You can find our environmental product information in our media center.
